## Supplier Partners

Oshkosh Corporation continues to evaluate and mitigate cybersecurity threats and attacks throughout our company. The theft of intellectual property and sensitive information due to malicious cyber activity threatens both economic and national security. Cyber actors have and continue to target the Commercial and Defense Industrial Base (DIB). The aggregate loss of intellectual property and information from our supply chain can undercut U.S. technical advantages and innovation as well as significantly increase risk to our supply chains.

Oshkosh Corporation is committed to fighting cyber intrusions both internally and alongside our supplier partners who login to our applications. As an added defense, we are implementing Multi-Factor Authentication (MFA) for Reliance and MOVEit applications effective June 3<sup>rd</sup>. MFA is a security system which requires users to provide multiple credentials to verify the user's identity for a login. We are requiring all suppliers to transition to MFA. We understand you may need to adjust processes to accommodate this requirement.

We have set up two options to utilize MFA,

1. Microsoft Authenticator that can be downloaded from Apple and Play App Stores
2. Automated phone call
  - a. Direct line option to select #
  - b. Cell option to select #
  - c. Text message that will prompt for a code

We have attached instructions on how to set up these options for your convenience. This information is also located in our Oshkosh Supplier Network here:

<https://osn.oshkoshcorp.com/training.htm>

If you have any questions comments or concerns, please contact your buyer. If you have issues setting up MFA follow the directions in training documentation.

Thank you for your continued support and partnership mitigating cyber-security threats.

Tina Schoner

SR. VP & CPO

A handwritten signature in black ink that reads "Tina R. Schoner".

Sean Ketter

VP Supply Chain Operations

A handwritten signature in black ink that reads "Sean Ketter".
